EDUCATION

New Jersey Institute of Technology – Newark, NJ

September 2022 – 2026

Bachelor of Science, Computer Science

Relevant Coursework: Database Systems, Introduction to Data Science, Probability & Statistics, Computer Systems, Operating Systems

WORK EXPERIENCE

The International Girls Academy

June 2026 – Present

Application Development Intern

- App Development: Building a full-stack application for the organization's startup program, enabling students to upload project information and judges to review and vote on submissions.
- Platform Design: Designing and implementing intuitive user interfaces for both student and judge-facing portals, ensuring a seamless experience for all program participants.
- Collaboration: Working with program coordinators to translate startup competition requirements into functional technical features.

ARIA (withvidya.ai)

June 2026 – August 2026

Capstone Project Manager

- Project Leadership: Served as project manager for a three-person capstone team, coordinating sprint planning, task delegation, and deliverable timelines.
- Stakeholder Management: Managed communication with an early-stage startup sponsor and faculty advisor, adapting plans and priorities in response to shifting project scope and sponsor availability.

Innocuous AI

February 2025 – May 2026

Website Development Intern

- Developing and Enhancing Web Interfaces: Contributing to the front-end of the Innocuous AI platform using HTML, CSS, JavaScript, and Django to build responsive and accessible user interfaces.
- Improving UI/UX and Branding Consistency: Enhancing usability and visual design by refining layouts, navigation, and branding elements across web pages.
- Supporting DevOps and Deployment Processes: Assisting with containerization, environment configuration, and deployment automation using Docker, Bash, and Azure CLI.
- Collaborating on Code Integration and Version Control: Managing feature development and code updates through Git, ensuring seamless integration with team workflows.

Twilight Media – New Milford, NJ

June 2023 – August 2024

Junior Videographer

- Event Coverage: Traveling to various locations to cover live conventions, providing high-quality photography and videography services that capture the essence of the events.
- Live Monitoring and Editing: Managing live-monitoring and on-the-fly editing during events to ensure seamless broadcasts, adapting quickly to any issues that arise to maintain viewer engagement.

PROJECTS

Blocked

09/2026 – Present

Full-Stack Application | React/Next.js, Supabase, Vercel

- Designing and building Blocked, a student-focused, Notion-style app for tracking goals across different life aspects (academics, health, relationships, career) so users don't lose sight of non-academic goals.
- Building the MVP with customizable life-aspect blocks and a manual balance dashboard using React/Next.js and Supabase, deployed on Vercel, with AI-powered time allocation planned for a later release.

Applicant Tracking System (ATS) Platform

01/2026 – May 2026

Capstone Project | React, Django, REST APIs, SQL

- Collaborated in a team of five to design and develop a full-stack Applicant Tracking System, implementing backend APIs and responsive front-end components while analyzing application workflows to improve process efficiency, system organization, and overall user experience.

Personal Portfolio

07/2024

ReactJS, Framer Motion, Tailwind

- Coded a responsive portfolio website that showcases my projects through dynamic animations and sleek UX/UI design. Utilizing React, Tailwind CSS, and Framer Motion, the site offers seamless interactivity and a visually engaging presentation of my work.

COURSES & CERTIFICATIONS

Codepath Android Development

February 2026 – May 2026
